

4-Zone RGBW Remoter Model No.: LSC-Mi-FUT096

Products Key Diagram

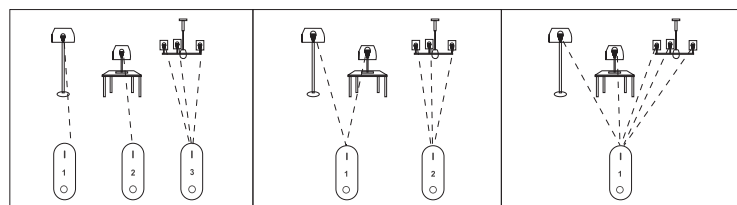

Note: *

The button is for "Zone ON" and for engaging and disengaging function

Zone Controls and Capacities

FUT-096 remote is easy to use. With the remote, all the lights can be divided into 4 zones. FUT-096 can engage unlimited number of controllers in the same zone. However, one controller can only engage up to 4 remotes

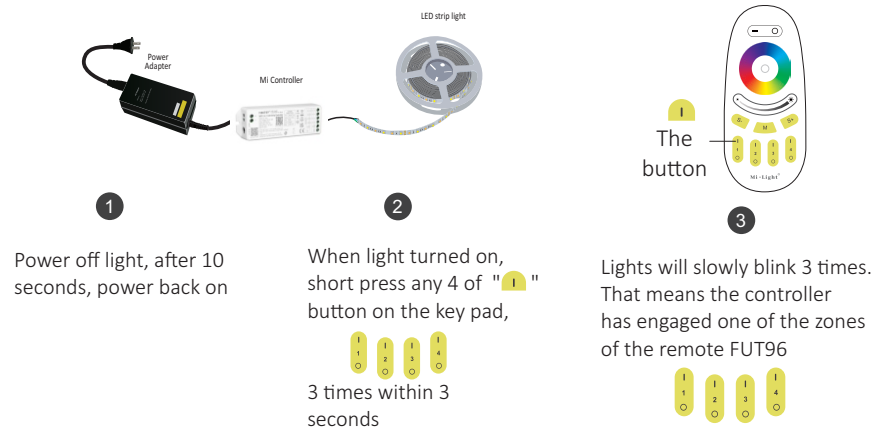

Note:

1. This remote only works with specific Mi-Light / Miboxer products; The compatible controllers are FUT037, W15. For more controllers, contact your agents.
2. During the time using the remote, if the indicated lamp blinking quickly, please change new batteries.
3. Indoor use. Away from high humid, over room temperature, and dusty environment.
4. For a better performance, free electromagnetic waves and avoid a large metal objects in between the remote and controllers.

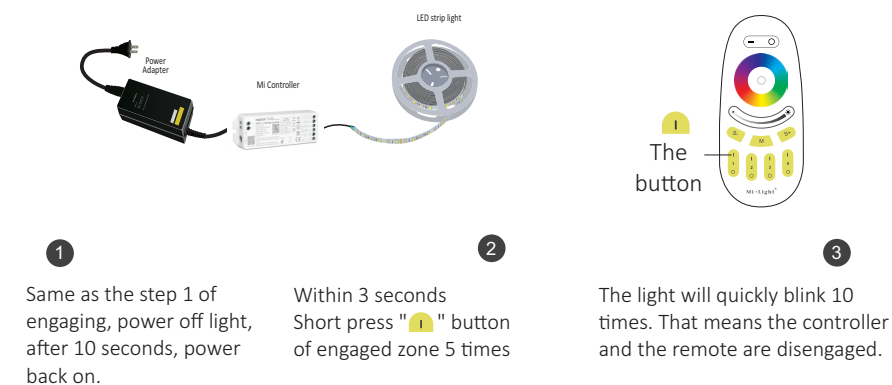

Instructions of Engaging/Disengaging Remote and Controller

Engaging

If engagement failed, please double check if the light was blinking when on step 2. Repeat the steps again if needed.

Disengaging

If disengagement failed, please double check which zone was engaged the controller and check if the light was blinking quickly when on step 2. Repeat the steps again if needed.
